

A full-body photograph of a man standing in a field. He is wearing a dark, ribbed, long-sleeved shirt and matching pants. The shirt has a subtle diagonal rib pattern. He is looking directly at the camera with a neutral expression. The background is a soft-focus landscape with green fields and trees under a clear sky.

UYN[®]

UNLEASH YOUR NATURE

TACTICAL
SERIES

UNLEASH YOUR NATURE

WE STRIVE FOR PERFECTION

"To UYN" means more than "to win": it means testing your limits, achieving your goals and going beyond them, finding new motivation every day. To do this, you need all the help you can get. UYN offers maximum performance with outstanding comfort, the best materials and the most refined functions.

MADE IN ITALY

FIRST IN INNOVATION

We have a goal, which is also our reason to exist: to create unique products never made before, disruptive innovations that can revolutionize the market. We have the ambition to succeed thanks to our long experience in the functional clothing sector, to an internal and groundbreaking production system, to an unparalleled research and development department. We are proud to carry out every phase, from the initial idea to the prototyping and marketing of the product, in our Headquarters in Asola, in the province of Mantua.

RESEARCH & DEVELOPMENT

WHERE THE FUTURE IS BORN

AREAS - Academy for Research and Engineering in Apparel and Sport is a modern 3500 sqm laboratory equipped with sophisticated equipment (including a climatic cell, a thermal dummy and a 3D body scanner) for product study and testing. AREAS also conducts functional tests on athletes in partnership with CeRiSM (Research Centre „Sport, Mountain and Health“) of the University of Verona. The data collected make it possible to create truly innovative products with increasingly high levels of performance.

UYN
UNLEASH YOUR NATURE

COMMITTED TO
a greener world

COMMITTED TO A GREENER WORLD

**WE WORK WITH A SINGLE
GOAL IN MIND: TO MAKE THE
WORLD A BETTER PLACE**

We do that not only by creating unique and innovative products, but also by respecting every element of the environment: water, air, earth. That's why our team, coordinated by an environmental engineer, spends every day studying increasingly eco-compatible solutions. Sustainability is our definitive mission. It holds the highest value for us.

WATER

SAVING OUR SEAS FROM

ECONOMY

UYN® TACTICAL SERIES

**APPAREL YOU CAN COUNT ON
WHEN YOU NEED IT MOST**

Run on a muddy trail, move swiftly through the forest, creep invisibly through the bushes. No matter how demanding your day is, with UYN TACTICAL collection you have the perfect clothing to face any challenge.

Lightweight yet durable, quick-drying, thermo-regulating and ultra comfortable. Our clothing is designed to support you in all conditions.

Thanks to patented and field-tested construction technologies, we guarantee absolute freedom of movement and strategic protection for your outdoor activities.

PATENTED

HYPERMOTION

ADVANCED. FREEDOM SYSTEM

The innovative cut made of a single piece supports correct posture and unrestricted freedom of movement.

SCIENTIFICALLY PROVEN BY CeRiSM

Tests carried out by CeRiSM (Research Centre „Sport, Mountain and Health“) of the University of Verona have shown that UYN shirts with HYpermotion technology exert significantly less pressure on the shoulders (both during movement and at rest) than shirts with a traditional shoulder construction.

HYPERMOTION

One seam in the back
for ultimate freedom of
movement.

PATENTED

COOLVENT

**COOLS DURING
ACTIVITY**

The channelled inner surface promotes a constant flow of air. It quickly absorbs sweat, cools the body during activity and keeps the skin dry.

PATENTED

HEATMEMORY

WARMS IN REST PHASES

The insulating air chambers of the HEATMEMORY technology protect the body against cooling down. This is especially important when your muscles cool down after the exercise phase. Your body stays warm and efficient.

RESIFIT

INSULATING MICROCHANNELS

Knees and elbow joints are subject to high levels of stress during exercise. This is why these areas are enclosed with a three-dimensional chamber system in order to create an insulating layer of air around the joints.

DRYLIGHT TECHNOLOGY

**GOODBYE, HEAT.
HELLO, COMFORT**

Anywhere sweat accumulates during sport, the Drylight technology by UYN® ensures wearing comfort. Thanks to its more permeable, ultra-absorbent knitting technique, moisture is quickly transported outwards.

MATERIALS THAT PERFORM, NATURALLY

COMBINING PERFORMANCE AND SUSTAINABILITY HAS BEEN OUR MISSION SINCE DAY ZERO. IN ORDER TO ACHIEVE THIS GOAL, NOTHING IS LEFT TO CHANCE.

THE EXCLUSIVE YARNS WE USE TO CREATE OUR PRODUCTS ARE NATURAL OR BIO-BASED AND FEATURE AMAZING ACTIVE PERFORMANCE.

WE BELIEVE THEY ARE PERFECT FOR YOU, AND FOR THE ENVIRONMENT.

NATEX

**100% BIO-BASED.
100% FUNCTIONAL.**

The obsessive search for high quality materials led us to select Natex, a bio-based high-tech yarn. Natex represents the highest level of combination of performance and respect for the environment.

MERINO WOOL

SOFT, WARM AND BREATHABLE

Merino wool is famous for its minimal weight and seductively soft feeling on the skin. UYN further optimizes these outstanding material characteristics through a special manufacturing technology to achieve a pleasantly soft and a quick drying result.

MULESING FREE: We only use Merinowool from South Africa, where the cruel practice of mulesing (a process during which parts of a sheep's bends are cut off) is illegal.

EXTREMELY LIGHT FIBER

- 34% lighter than polyester and 20% lighter than nylon
- Very low conductivity for a high level of insulation and thermal comfort
- Hydrophobic by nature and moisture repellent. It dries very quickly providing pleasant wearing comfort.
- 2.5 times more abrasion resistant than cotton
- Hypoallergenic
- 100% recyclable

TEXLYTE NANO RAISING THE LEVEL OF COMFORT

UYN[®] garments made with Texlyte Nano are extremely comfortable thanks to their pH-balanced and hypoallergenic effect. At the same time, the high-tech fiber Texlyte Nano is very light, allowing air to circulate freely between the skin and the garment. This also reduces the overall weight of the equipment for lengthier periods of activity.

**FUSYON
DEFENDER
SOFT YET
STRONG**

Thermoregulation is its mission, protecting the most exposed areas its added value. The FUSYON DEFENDER base layer line is made from extra-fine Merino wool for effective insulation: it warms the body at low temperatures, wicks away sweat quickly and keeps the skin dry. The fabric's special manufacturing technique creates protective zones at the shoulders, abdomen, tights and buttocks for maximum comfort in all the situations adventure throws at you.

For LOW temperature

No excuses. This gear is built to defy heat. Ultralight and with integrated ventilation systems, it is optimal for sport in hot weather conditions.

FUSYON DEFENDER SHIRT/PANTS

Hypermotion

- ① Exclusive zero-seam shoulder construction for maximum freedom of movement and body postural support.

Shoulder Pads

- ② The 3D knit fabric has an increased thickness for breathable protection. This system helps to cushion the weight and absorb vibrations when wearing a backpack.

Coolvent

- ③ The channelled inner surface promotes a constant flow of air. It quickly absorbs sweat, cools the body during activity and keeps the skin dry.

Heatmemory

Insulating air chambers store body heat and protect against cooling. This is especially important when your muscles cool down after the exercise phase. Your body stays warm and efficient.

Resifit

Knees and elbow joints are subject to high levels of stress during exercise. This is why these areas are enclosed with a three-dimensional chamber system in order to create an insulating layer of air around the joints.

Drylight

Anywhere sweat accumulates during sport, Drylight ensures wearing comfort. Thanks to its more permeable, ultra-absorbent knitting technique, moisture is quickly transported outwards.

Iso Chambers

Thanks to their structure, ISO CHAMBERS increase the insulation power, preventing the cooling of the most sensitive parts of the body.

**AMBITION
DEFENDER
ENHANCED
PROTECTION**

Dynamic, sporty, designed to move in nature. The AMBITYON DEFENDER base layer line is the result of close collaboration with our athletes seeking total freedom of movement. Insulating protectors at the shoulders, abdomen, quadriceps and buttocks make it ideal for the most demanding outdoor activities.

For **LOW** temperature

No excuses. This gear is built to defy heat. Ultralight and with integrated ventilation systems, it is optimal for sport in hot weather conditions.

AMBITION DEFENDER SHIRT/PANTS

Hypermotion

- ① Exclusive zero-seam shoulder construction for maximum freedom of movement and body postural support.

Shoulder Pads

- ② The 3D knit fabric has an increased thickness for breathable protection. This system helps to cushion the weight and absorb vibrations when wearing a backpack.

Coolvent

- ③ The channelled inner surface promotes a constant flow of air. It quickly absorbs sweat, cools the body during activity and keeps the skin dry.

Heatmemory

Insulating air chambers store body heat and protect against cooling. This is especially important when your muscles cool down after the exercise phase. Your body stays warm and efficient.

Resifit

Knees and elbow joints are subject to high levels of stress during exercise. This is why these areas are enclosed with a three-dimensional chamber system in order to create an insulating layer of air around the joints.

Drylight

Anywhere sweat accumulates during sport, Drylight ensures wearing comfort. Thanks to its more permeable, ultra-absorbent knitting technique, moisture is quickly transported outwards.

Iso Chambers

Thanks to their structure, ISO CHAMBERS increase the insulation power, preventing the cooling of the most sensitive parts of the body.

**EVOLUTYON
XTREME
ACTIVE
COMFORT**

Breathable, ergonomic, comfortable: UYN Evolution base layers are made with Natex bio-fibre for perfect climate control with exclusive design for optimal body support. Ideal for intense activity at moderate temperatures.

For **MEDIUM** temperature

This gear is designed for being active at medium temperature. It keeps odor and sweat away, so you keep going and going in total comfort.

EVOLUTYON XTREME SHIRT/PANTS

Hypermotion

- ① Exclusive zero-seam shoulder construction for maximum freedom of movement and body postural support.

Coolvent

- ② The channelled inner surface promotes a constant flow of air. It quickly absorbs sweat, cools the body during activity and keeps the skin dry.

Heatmemory

- ③ Insulating air chambers store body heat and protect against cooling. This is especially important when your muscles cool down after the exercise phase. Your body stays warm and efficient.

Resifit

- ④ Knees and elbow joints are subject to high levels of stress during exercise. This is why these areas are enclosed with a three-dimensional chamber system in order to create an insulating layer of air around the joints.

Drylight

- ⑤ Anywhere sweat accumulates during sport, Drylight ensures wearing comfort. Thanks to its more permeable, ultra-absorbent knitting technique, moisture is quickly transported outwards.

COMFORT FIT

**Memorizing a new shape,
without adding new seams**

Through an exclusive manufacturing process, we allow a 3D knitted garment to memorize a desired shape. In this way we transform a tight fit into a comfort fit without adding seams and without affecting the functionality of the fabric.

REGULAR FIT

EVOLUTYON XTREME underwear is also available in the Regular Fit version: it follows the shape of the body without compressing, promoting comfort as well as freedom of movement.

**MOTYON
XTREME
ADVANCED
BREATHABILITY**

Everything starts from the foundations. Without the right basis, there can be no success. This also applies to clothing. Following this philosophy, UYN® has developed its Motyon base layer collection. The name is a programme. The entire range was designed so that sports lovers and ambitious athletes alike can concentrate entirely on their activity in spring and summer. Lightness, wearing comfort and maximum breathability characterise Motyon base layer. A collection that embodies success.

For **HIGH** temperature

No excuses. This gear is built to defy heat. Ultralight and with integrated ventilation systems, it is optimal for sport in hot weather conditions.

MOTYON XTREME SHIRT/BOXER

4-Ways Ventilation

① Fine 3D ribs create a 2-millimetre gap between the skin and the fabric, allowing air to circulate more freely.

Coolvent

② The channelled inner surface promotes a constant flow of air. It quickly absorbs sweat, cools the body during activity and keeps the skin dry.

Hypermotion

③ Exclusive zero-seam shoulder construction for maximum freedom of movement and body postural support.

Drylight

④ Anywhere sweat accumulates during sport, Drylight ensures wearing comfort. Thanks to its more permeable, ultra-absorbent knitting technique, moisture is quickly transported outwards.

**ENERGYON
XTREME
EXTREME
COOLING**

Release your energy. Push your body to its maximum power. Throw yourself into high-intensity activities. Now there is Energyon – the undergarment so light that it becomes air. Thanks to the Flowtunnels advanced temperature control system, micro perforations and three-dimensional channels generate an exceptional air flow on the skin that cools the body and disperses excess perspiration. We were the first to develop it: with us your performance shoots into the future.

For **HIGH** temperature

No excuses. This gear is built to defy heat. Ultralight and with integrated ventilation systems, it is optimal for sport in hot weather conditions.

ENERGYON XTREME SHIRT

- ① **Hypermotion**
Exclusive zero-seam shoulder construction for maximum freedom of movement and body postural support.
- ② **Flowtunnels**
Exclusive combination of micro-holes and 3D channels provides powerful ventilation

FLOWTUNNELS

FUTURE OF VENTILATION

The combination of micro-holes and three-dimensional channels provides a powerful ventilation in areas of high body heat production. A system of three-dimensional structures allows the air to circulate exerting a cooling effect.

UYN® TACTICAL SOCKS

COOL AIR FLOW

WELL VENTILATED FEET

3D micro-channel structure for air circulation;
keeps feet dry and at a comfortable
temperature.

ERGOLOGIC FOOTBED

COMFORT TO THE MILLIMETRE

Anatomically shaped footbed for athletic stresses and movement

ASYMMETRICAL TOE

The tip of the sock is ergonomically shaped for the right and left foot, so there are no folds or lumps while walking.

TARGET COMPRESSION BANDAGE

**COMFORT TO THE
MILLIMETRE**

Anatomically shaped footbed for athletic stresses and movement

SHIN AND CALF PROTECTOR

REDUCE IMPACTS

Cushioning protection that simultaneously guarantees air flow.

PRESHOCK SHIELD

SHOCK ABSORBING TECHNOLOGY

Absorbs shocks and protects the sensitive Achilles tendon with a 3D knitted structure.

DEFENDER MERINO SOCKS

Durable, thermo-regulating, intelligently cushioned to ensure strategic foot protection and maximum in-shoe comfort. Ideal for cold climates and extremely quick-drying thanks to the exclusive combination of Merino wool with bio-based Natex yarn. Perfect for outdoor activities, long-distance hiking and carrying heavy loads.

DEFENDER MERINO SOCKS

Cool air flow

① 3D micro-channel structure for air circulation; keeps feet dry and at a comfortable temperature.

Ergologic footbed

② Anatomically shaped footbed for athletic stresses and movement.

Anti-impactor

③ Frontal shock-absorbent 3D knitted structure that simultaneously guarantees efficient foot ventilation.

Target compression bandage

④ Double asymmetric bandage with perspiration integrated. For localized compression exactly where needed.

Preshock shield

⑤ Absorbs shocks and protects the sensitive Achilles tendon with a 3D knitted structure.

**2IN
DEFENDER
SOCKS**

Double the activity and double the comfort with the 2IN DEFENDER socks. Thanks to the unique Two Layers construction, these socks feature a double layer of fabric designed to reduce the factors that cause blisters. Three-dimensional micro-channels promote air circulation and help keep feet cool and dry for longer. The effect is enhanced by the exclusive bio-based Natex yarn that instantly disperses sweat and eliminates odour. Strategic protections maximise in-shoe comfort.

UYN® TACTICAL SHOES

Durable yet ultra-light, elastic yet stable, exceptionally breathable yet strategically reinforced. UYN TACTICAL shoes reconcile opposites in a revolutionary way. Innovative zero-seam construction and high-quality natural fibres to offer the absolute comfort of a sock – with all the performance of technical shoes for demanding conditions.

NATURAL & ANTIBACTERIAL

With UYN shoes we have put nature at your feet because we believe that there is nothing more powerful than natural fibres. Pure MERINO wool and exclusive NATEX maintain the temperature of your feet constant and provide an antibacterial effect. No sweat, no smell.

FLEXIBILITY-AND-HOLD

Due to UYN®'s revolutionary production method combined with the Conflex Yarn, individual zones such as heel, toe and sides may be partially stiffened, while the other parts of the shoe retain their extreme elasticity.

ECO-FRIENDLY

These shoes are developed on the idea that there is always a better way. From the materials we choose, to where we build our products, we always look through the lens of product philosophy, responsible manufacturing, and community engagement.

HALOFLEX KNIT PACKED WITH TECHNOLOGY

Haloflex shoes, produced without seams, fit every foot perfectly. The 3D knitted technology enables the complete shoe upper, including the sole zone, to be produced as one piece. In this way, specific areas can be equipped with different structures and therefore different functions. This opens up completely new possibilities in shoe development. Individual zones such as heel, toe and sides may be partially stiffened while the other parts of the shoe retain their extreme elasticity.

YAK CASHMERE

THE SUPER-WOOL FROM THE HIMALAYAS

The yak knows how to protect itself from the cold. This large bovine, which lives between Mongolia, the Tibetan plateau and the slopes of the Himalayas up to 6,000 meters above sea level, has developed an extremely dense, long fur to survive even extreme temperatures - as low as minus 50 degrees!

PRECIOUS

Yak Cashmere is among the most precious wool in the world

WARM

Suitable for temperatures far below zero

SOFT

With a diameter ranging from 16 to 20 microns, the softness of Yak fibre is similar to that of Cahsmere.

BREATABLE

It absorbs up to 30% of its weight in moisture, performing better than most man-made fibres.

ODOR-RESISTANT

The anti-microbial properties of Yak Cashmere reduce odor formation

HYPOTERIGENIC

Yak Cashmere does not contain lanolin which is the cause of most allergic reactions

MOVER SHOES

Lightweight, ultra-ventilated, powerful. The UYN MOVER shoe is designed for long hours on your feet or walking. Made from a combination of Merino wool and recycled polyamide, it keeps the foot at the ideal temperature and quickly absorbs sweat. The elastic upper with patented AIR DUAL ventilation system features special reinforcements to withstand the wear and tear of everyday use and dynamic activities. The U-GRIP sole ensures an optimal connection with the ground.

MOVER SHOES

- ① One-piece upper made from a blend of extra-fine Merino wool and recycled polyamide: ultra-elastic, breathable and thermo-regulating
- ② Patented AIR DUAL ventilation system, integrated in the upper. The fine knit structure allows moisture to escape while preventing water penetration.
- ③ Insole made of Merino wool and recycled felt.
- ④ the most exposed areas feature advanced cut and tear protection, achieved through the extraction and stabilisation of polyurethane yarns.
- ⑤ The U-GRIP sole with rubber tread and Adaptive Lugs provides maximum traction on uneven and wet surfaces.

U-GRIP SOLE

THE NEW BASE FOR YOUR ADVENTURES

The base of our award-winning U-CONTROL sole, with additional features that make it high-performance on uneven terrain and wet surfaces. The rubber tread has a larger width and deeper lugs for greater stability. Adaptive Lugs that extend laterally change their shape to adapt to the irregularities of the ground, increasing traction. For the midsole, we used a low-density EVA resulting in a greater rebound effect and outstanding comfort. The heel design helps to absorb impact forces and return energy with every step.

RAID LITE SHOES

UYN RAID LITE is the lightweight, athletic and exceptionally comfortable shoe for all day wear. Made of fine Yak Cashmere wool, the knit upper maintains a constant foot temperature, disperses sweat quickly, is naturally bacteriostatic and odor-resistant. The ultra-flexible EVA midsole bends naturally with your foot while the rubber outsole provides perfect grip on uneven surface.
