SPORTEAR EARPLUG XPRO

Code: D5-XPRO

Brand: Defcon 5 2024

Hearing protection XPRO series.

PROTECT YOUR HEARING Earplugs are essential for hearing protection. Typical earplugs protect your hearing, yes, but they can be a hassle. Sometimes you need to hear and they block too much, so you have to take them out. They're small and easily lost....

After the X-Pro is comfortably settled in your ear, you can activate the hearing protection with the push of a button. The closed valve will now protect your hearing by giving you 30dB of noise reduction with the foam tips (24 dB noise reduction with silicon tips).

When you need to hear again, instead of completely removing the earplugs, simply press the button again to open the acoustic valve, allowing sound to pass through naturally.

EASY CONTROL: Push button to hear, push again to protect.

19 dB NRR Open

30 dB NRR Closed

X-Pro Plugs are made from soft, hypoallergenic, medical grade polymer. Low profile design allows you to keep them in place while wearing a mask, helmet, hat, or while using a phone, headphones or supplemental hearing muffs. X-Pro Earplugs are washable and reusable to help you avoid the hassle and extra expense of constantly having to replace disposable earplugs. Uses Include: Hunting, Auto Racing, Military, Law Enforcement, Sporting Events, Target Shooting, Concerts, Industrial, Sleeping/Snoring.
