# **MACTRONIC SIRIUS T25 - MULTI- FUNCTIONAL FLASHLIGHT 2500 LUMENS 5000 mAh**

**Code: MAC-THH0172****Brand: Mactronic**

EDC Sirius flashlights were designed for survival enthusiasts, people always looking forward for another adventure. The Sirius T25 is the strongest model in the series. Despite its compact size and a weight of only 124 g, the device's CREE XH-P 50 LED generates 2500 lumens, which is strong enough to illuminate everything at a distance of up to 360 m. A remarkable result given the flashlight's compactness. The device leaves other flashlights in the dust, yet remains small enough to fit all sorts of pockets, backpacks and jackets. An important piece of your EDC gear. The flashlight's controller also has weaker lighting modes that ensure a longer operating time with one recharge - up to 16 hours at 160 lumens. The Sirius T25 remembers the last used mode and uses an interlock for preventing accidental activation. The flashlight's 21700 battery can be recharged via a magnetic cable connected to a socket or to a USB adapter. The flashlight's elegant housing in coyote brown is knurled for better grip with dirty or inexperienced. The product's protection class is IP68. A feature common for the entire Sirius range. The device comes with a clip for attaching it to various pieces of garment or equipment and a magnetic charging cable.

Weight: 180 grams
