MACTRONIC BLACK EYE 1000 - RECHARGEABLE HIGH POWER FLASHLIGHT 1000 LUMENS 3200 mAh

Code: MAC-THH0045

Brand: Mactronic

Mactronic BLACK EYE® 1000 is an upgraded version of the popular rechargeable flashlight from the Tactical Line with increased power and increased beam distance. The BLACK EYE® 1000 model is characterized by very good ratio of light power to its dimensions. A little over 160 gr of weight (with battery) and a length of 136 mm means that the BLACK EYE® 1000 flashlight can be always with you - in your pocket, backpack or tactical equipment pouch, regardless of the conditions and destination. BLACK EYE® 1000 is extremely solidly made equipment, so that it can meet the expectations of even the most demanding users, including law enforcement officers. The flashlight is shock resistance from 1.5 meters and will withstand water and dust thanks to the IP65 protection class. The flashlight offers five operating modes, including the strobe and SOS function. The light source is a powerful OSRAM P9 10W LED, while the power supply is a 3.7V lithium-ion battery with a capacity of 3200 mAh. The operating time in the highest 1000 lumens mode, that allows you to illuminate the darkest places, is 3 hours and in the LOW mode up to 23 hours, which gives us an almost 24 hour, uninterrupted light source. Many users will also appreciate the function of last setting memory mode and the availability of additional accessories such as holsters, mounts or color filters.
